CAPABILITY STATEMENT

Energy, water, and indoor air efficiency, designed as one solution

Tessaro Collective is a consultative firm. We diagnose where a property is losing money on energy, water, and air quality, design a coordinated set of technologies to fix it, and verify the results against utility data.

WBE · WOSB

WBENC-Certified WBE and SBA-certified Women-Owned Small Business

CORE CAPABILITIES

- Facility energy, water, and air quality assessments
- HVAC performance optimization
- Power quality and electrical efficiency
- Refrigeration and cold storage efficiency
- Water flow conditioning and usage analytics
- Odor, mold, and allergen control
- Measurement and verification of savings
- Residential and multifamily programs

DIFFERENTIATORS

- Consultative: we start with your problem, not a product
- Technology-neutral, coordinated solutions for each site
- Every savings claim backed by documented results
- Verification against pre- and post-install utility data
- Built for multi-site national and regional rollouts
- Certified women-owned diversity spend

34%
Water reduction, 200+ room hotel

28.5%
Water reduction, student housing community

12.5%
